INTRO

The PONS sofa and table system, designed for Tecno by Rodolfo Dordoni was specially conceived to furnish waiting areas, lounges and managerial environments, but is perfectly at home in domestic settings too. The PONS D011 system is characterised by modularity, easy assembly and extremely flexible components, plus a high level of comfort obtained through the use of different densities of padding.

The system comprises a basic modular structure equipped with a series of universal fittings, to which all the types of seat, backrest and table (120 x 80 cm, 160 x 80 cm, diam. 130 cm) can be attached. Thanks to elements that can be fitted in many different positions, the system is extremely easy to personalise and adapts to the needs of its environment.

The aluminium bases are either polished or painted in matt dark grey. The table tops can be in black laminated FS, matt white or dark grey lacquer, gloss white or dark grey lacquer, white Carrara marble or black Marquina marble.

The system's design features various elements characteristic of Tecno collections (legs and finishes) and therefore integrates perfectly with other Tecno products.
